Professional Summary

PHP Software Developer with 1 year of experience in **PHP, Laravel, MySQL, JavaScript, HTML, and CSS**. Skilled in **Laravel MVC, RESTful APIs, CRUD operations, authentication, validation, database integration, and business logic**. Experienced in **OOP, API integration, Git, debugging, responsive web development, and SDLC**. Strong ability to develop **scalable, secure, and maintainable web applications**.

Technical Skills

Languages : PHP, C/C++, SQL (MySQL), JavaScript, HTML, XML, JSON, CSS,
Frameworks :Laravel, Node.js, Flask, Django, Bootstrap
AI Tools and Version Control : Git, GitHub, ChatGpt, Cluade, VS code, Canvas,
Core Concepts :Data Structures Algorithms, Object-Oriented Programming, REST APIs,
Others : Communication, Teamwork, Problem Solving, Time Management

Experience

Web Developer(PHP ,Laravel) | *Cyber Rafting* *Dec 2025 –Sept 2026*

- Developed and maintained **PHP/Laravel web applications** using Laravel MVC, MySQL, JavaScript, HTML, and CSS, implementing reusable modules, CRUD operations, authentication, validation, and business logic
- Built and integrated **RESTful APIs** and database-driven features, improving application functionality, data flow, and system reliability while reducing manual business processes
- Optimized **MySQL queries, backend logic, and application performance**, resulting in faster page/API response times and a smoother user experience
- Collaborated with team members to troubleshoot bugs, test features, and deliver production-ready enhancements, contributing to **more reliable, maintainable, and scalable web applications**.

Associate Data Operation | *Amazon* *March 2025 - April 2025*

- Implemented and monitored various data compliance frameworks using SQL, ensuring adherence to regulatory and internal data governance standards.
- Wrote and optimized complex SQL queries to extract, validate, and analyze large datasets, supporting compliance reporting and audit requirements.
- Reviewed and validated **image and video data** for Amazon Robotics fulfillment operations, accurately identifying **stowing actions, product locations, and inventory-related information** according to defined SOPs.
- Audited **10,000+ frames** with a focus on accuracy, consistency, and adherence to quality standards, achieving **98%+ annotation/validation accuracy**.

Software Developer Intern | *Codec Technologies* *Dec 2024 – March 2025*

- Developed responsive and reusable **React.js components** using JavaScript (ES6+), HTML, CSS, and modern UI practices to build user-friendly web applications.
- Integrated **RESTful APIs** with frontend applications, implementing dynamic data rendering, form handling, validation, and state management for interactive user experiences.
- Improved application usability and performance by optimizing **component structure, API calls, reusable code, and responsive layouts**, reducing development effort and improving maintainability

Education

Sinhgad Institute Of Technology And Science **BE in Information Technology** | GPA : 8.07 *Sept 2021 – June 2024*
Gramin Polytechnic, Vishnupuri, Nanded **Diploma In Computer Engineering** | Percentage : 87.77 *Aug 2018 – Aug 2021*

Projects

AI Resume & Interview Coach | *Node.js, Express, React, PostgreSQL, Google Gemini API* *2026*

- Developed an AI-powered platform that generates structured learning paths and chapter content based on user input, leveraging LLM integration with the Google Gemini API.
- Designed and implemented RESTful APIs using Node.js and Express to manage course generation workflows and integrate with external AI and YouTube APIs.

E-Commerce | *React.js, Redux Toolkit, Node.js, Express.js, MongoDB* *2026*

- Developed a full-stack Shopify-inspired e-commerce platform using React.js, Redux Toolkit, Node.js, and Express.js, implementing responsive product browsing, cart management, and shopping workflows.
- Engineered reusable frontend components and centralized state management with Redux Toolkit, improving application scalability, maintainability, and user experience.

Product & Item Hub – Modern RESTful CRUD Management | *C#, JavaScript, CSS, HTML, Docker* *2026*

- Developed a RESTful CRUD application for managing products and nested inventory items with search, creation, deletion, and quantity management functionality.
- Implemented structured API-based data operations and responsive interfaces to streamline product and inventory management workflows.

Awards and Certifications

Python Programming | *Certification* *2025*
Certified Generative AI Professional | *Certification* *2025*
Foundation In Web Development | *Certification* *2024*
